## Value Spectrum

**Network status**

The list below shows responses to "ping" echo requests sent from a central location in the OUDN at five minute intervals.

Unresponsive addresses are shown first, then those which responded normally. Local (\*.cam.ac.uk) systems are listed before external systems, and sorted within each group by domain (lightest component first). Note that hostnames may appear several times for systems with multiple addresses (e.g. routers, multi-homed hosts) or those which refer to a group of hosts (e.g. ipsec.cam.ac.uk). Round trip times are shown in parentheses.

**Network reachability from omg2.csl.cam.ac.uk on Monday March 30 13:55 BST 2009**

[OK]	131.111.2.88	gateweb.net.cs.cam.ac.uk	(2 ms)
